Enginuity, LLC Earns Prestigious STAR Qualification from Leading Trade Association

Mechanicsburg, Pennsylvania - Mechanical Service Contractors of America, MSCA, recognizes Enginuity, LLC as a MSCA STAR Qualified Contractor. Enginuity, LLC was designated as a STAR after surpassing stringent business and HVAC service standards set forth by MSCA. The association's initiative of excellence offers proof to building owners and facility managers that the STAR qualified contractor is providing the highest level of skill, quality, value, training and professionalism in the industry.

Focusing on excellence in commercial, industrial and institutional HVAC service, the MSCA STAR program is the first in the U.S. to qualify contractors based on overall operations of the company. "Certification of the contractor's technicians is only one component of the program," explains MSCA Chairman, Mark Kerney. Contractors also have to offer outstanding customer service, uphold a strict code of business ethics, maintain a safety record above the industry average, and focus on continuing education and training for all employees.

Enginuity, LLC was recently awarded the MSCA STAR designation after a review by the third-party qualifier, National ITC Corporation, a national ISO 9001:2000 certified and ANSI accredited Certifier, determined the company met all criteria set forth by the MSCA. "The MSCA STAR logo is a testament to the professionalism of our associates. Enginuity is committed to providing our clients the best value in

the industry by providing superior technical service for commercial, industrial and institutional mechanical systems," says James C. Mooney, PE, and President and owner of Enginuity, LLC.

The Mechanical Service Contractors of America (MSCA), a national trade association and subsidiary of the Mechanical Contractors Association of America, Inc. (MCAA), represents more than 1,100 firms involved in the service, maintenance, retrofit, and repair of all types of comfort systems including heating, air conditioning, ventilating, refrigeration, and plumbing in commercial and industrial facilities. MSCA provides its members with the highest quality information, educational services and programs to ensure economical, efficient, and reliable operation of building systems.

Contractors that achieve MSCA STAR Qualified status belong to an elite group. Enginuity, LLC is one of the few contractors in the nation and the first in Pennsylvania to achieve this prestigious standing.

"Mechanical systems are the life blood of a building. When tenant comfort, process performance and economical operation are at stake, it's critical to partner with a MSCA STAR contractor like Enginuity," said Jim Mooney. "The MSCA STAR certification represents our commitment to service excellence."

Enginuity, LLC is a full service Mechanical Contractor specializing in Design and Construction of HVAC, Plumbing, and Piping systems, Service and Maintenance, and Performance Contracting Projects for commercial, industrial, and institutional clients.
